EMAIL TEMPLATES AND COMMUNICATION RULES

Prepared for: Client outreach coordinator
Development partner: CJ Sacdalan
Updated: September 6, 2026
Purpose: Safe, accurate templates for manual client communication

---

> These templates are starting points. Replace every bracketed field, remove lines that do not apply, and check every statement before sending. Keep outreach manual and personalized.

1. BEFORE YOU EMAIL

- Confirm that the business appears active using a current public source.
- Write down one real observation or possible opportunity. Do not invent a problem.
- Use only a clearly published business email or official contact form. Never guess an email address.
- Check the tracker to make sure the business has not opted out or already been contacted.
- Do not scrape LinkedIn, automate LinkedIn messages, or send messages automatically.

2. FIRST OUTREACH EMAIL

> Subject: A possible way to improve [specific process] at [Business name]
>
> Hi [Name or Business team],
>
> I came across [Business name] through [public source] and noticed [one accurate observation].
>
> I work with CJ Sacdalan, a software developer who builds custom websites and business systems, including automation, analytics, and AI-assisted tools. Based on [observation], one possible improvement could be [simple idea] to help [realistic benefit].
>
> Would you be open to a brief email conversation about how you currently handle [process or problem]? If this is not relevant, please let me know and I will not follow up.
>
> Regards,
> [Your name]
> Client outreach coordinator working with CJ Sacdalan
> [Your business contact information]

3. WHEN A PROSPECT IS INTERESTED

> Subject: Re: [Original subject]
>
> Hi [Name],
>
> Thank you for replying. To understand the request before I involve the developer, could you tell me:
> 1. What is the main problem you want to solve?
> 2. How do you handle it now, and which part takes the most time?
> 3. What result would make the project useful for you?
> 4. Are there features you already know you need, and who will use them?
> 5. Do you have a preferred launch date or budget range?
>
> A custom quote and delivery schedule will be confirmed after the developer reviews the scope.
>
> Regards,
> [Your name]

4. WHEN YOU NEED A TECHNICAL ANSWER

> Thanks for explaining that. I do not want to give you an inaccurate answer, so I will confirm the technical details with our developer and reply after the request has been reviewed.

5. WHEN THE PROSPECT ASKS FOR A PRICE

> Our work is priced according to the actual features and scope rather than a fixed package. If you share the main problem, required features, intended users, and preferred timing, I can prepare the details for a custom quote from the developer.

6. ONE POLITE FOLLOW-UP

> Subject: Following up — [short topic]
>
> Hi [Name or Business team],
>
> I wanted to follow up on my note about [specific idea]. If improving [process] is not a priority right now, no problem—I will close my note and will not continue following up.
>
> Regards,
> [Your name]

7. NO-INTEREST OR OPT-OUT REPLY

> Thank you for letting me know. I have noted your preference and will not contact you again about this. Wishing you and the team well.

8. HANDOFF SUMMARY FOR THE DEVELOPER

> Business: [Business name, industry, and location]
> Contact: [Name, role, and public business contact used]
> Current problem: [Client's own words or a careful summary]
> Current process: [How they handle it now]
> Desired result: [What they want to improve]
> Requested features: [List; mark uncertain requests clearly]
> Users: [Who will use the system]
> Preferred timing: [Date or 'not provided']
> Budget range: [Range or 'not provided']
> Promises already made: [Ideally 'none']
> Questions for developer: [Feasibility, price, timeline, technical questions]
> Source links and notes: [URLs and useful context]

9. COMMUNICATION RULES

- Tell the truth about the business, the portfolio, and what has been approved.
- Do not claim testimonials, results, or clients that cannot be documented.
- Do not finalize price, discounts, deadlines, or technical feasibility without developer approval.
- Do not promise that a suggested feature will definitely solve the problem.
- Personalize each message; do not send the same generic message to a large list.
- Send no more than one polite follow-up unless the prospect continues the conversation.
- Stop immediately when a business declines or asks not to be contacted, and mark it in the tracker.
- Record every sent message, reply, follow-up date, and handoff in the lead tracker.
